

## Broadband for System Integrators

## Secure and Reliable Broadband for your customers

Carrier Grade Ethernet with a 99.999% SLA

vUnity is a turnkey Ethernet Solution with built in safeguards against outages and speeds up to 200Mbps. vUnity includes enterprise features, Static IP Assignments, Full QoS and installation within ten business days. All bandwidth is dedicated to each customer and backed with advanced denial of service protection.

## No Revenue Commitments

Begin ordering today

vUnity simplifies the provisioning lifecycle by placing partners in control. Instantly begin ordering and take full control of the installation process. Specify installation dates, equipment delivery locations and additional IP Assignments required. vUnity guarantees to be installed on your schedule to ensure your clients expectations are met.

## National Availability

Bandwidth without borders

vUnity Broadband is available in most major markets for any single site or for multi-site deployments. vUnity is fully MPLS capable and the prequalification tool at [vUnity.com](http://vUnity.com) or in the sales portal will help you determine service options for each location.

## Partner Benefits

We're Your Partner!

vUnity works to compliment service from Value Added Resellers such as VOIP Providers and technicians to deliver a seamless experience to the end user. Increase revenue with a complimentary offering to your existing services and expand your market reach with nationwide coverage. Simplify a turnkey solution for your clients voip, cloud or mission critical service with new broadband delivered on time and on your schedule.
